

Scan2Lead INTERFACE – All your visitors' data immediately in your system

With Scan2Lead INTERFACE you receive all your contacts immediately in your CRM, marketing or lead retrieval system – smoothly and without any effort.

- + Exhibitors can book an interface to integrate Scan2Lead in their own lead retrieval system or for a direct connection to their CRM or marketing system.
- + You can use your own applications and devices and gain access to the data of registration in real time via a professional API (Application Programming Interface).
- + Our experienced team of developers is happy to support you during the evaluation and development of your customised solution.
